

Git-HOL 1:-

HandsOn:-

- Step 1: Setup your machine with Git Configuration
 1. To check if Git client is installed properly:

```
C:\Users\riyak>git version
git version 2.50.1.windows.1
```

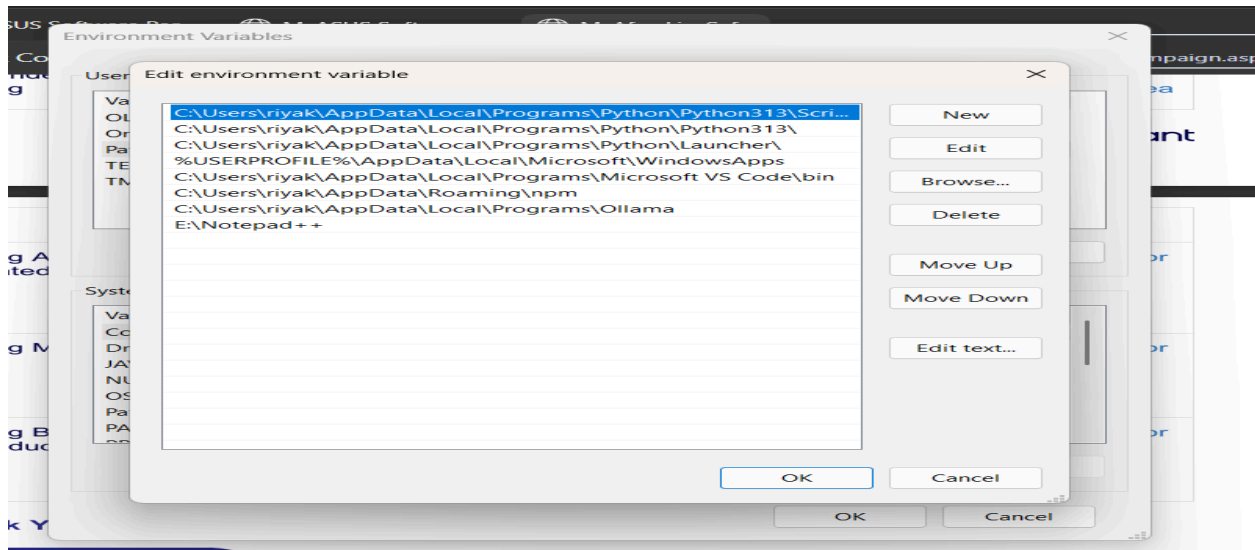

2. To configure user level configuration of user ID and email ID execute

```
C:\Users\riyak>git config --global user.name "Riya Thakur"
C:\Users\riyak>git config --global user.email "rariya2004@gmail.com"
```

3. To check if the configuration is properly set, execute the following command.

```
C:\Users\riyak>git config --global --list
user.name=Riya Thakur
user.email=rariya2004@gmail.com
```

- Step 2: Integrate notepad++.exe to Git and make it a default editor
 1. To check, if notepad++.exe from Git bash

2. Exit Git bash shell, open bash shell and execute

```
C:\Users\riyak>notepad++
```

3. To create an alias command for notepad++.exe, execute

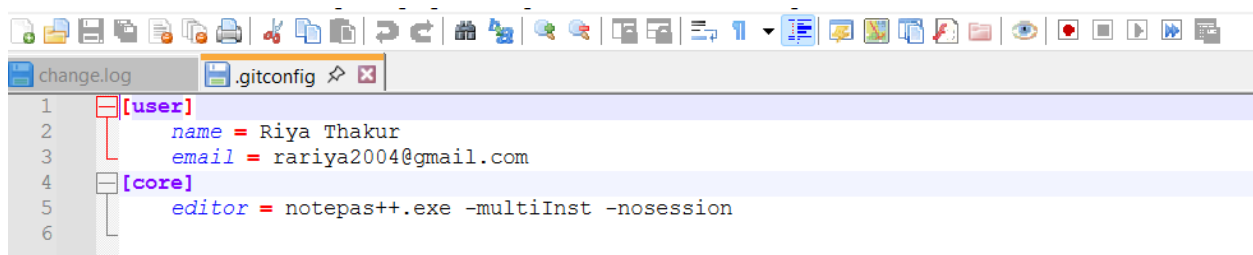

```
$ notepad++.exe bash -profile
```

4. To configure the editor, execute the command

```
C:\Users\riyak>git config --global core.editor "notepad++.exe -multiInst -no-session"
```

5. To verify if notepad++ is the default editor, execute the command

```
C:\Users\riyak>git config --global -e
hint: Waiting for your editor to close the file... notepad++.exe -multiInst
-nosession: line 1: notepad++.exe: command not found
error: there was a problem with the editor 'notepad++.exe -multiInst -nosession'
```

- Step 3: Add a file to source code repository
 1. Open Git bash shell and create a new project “GitDemo” by executing the command

```
C:\Users\riyak>git init GitDemo
Initialized empty Git repository in C:/Users/riyak/GitDemo/.git/
```

2. Git bash initializes the “GitDemo” repository. To verify, execute the command

```
C:\Users\riyak>ls -al
total 32675
drwxr-xr-x 1 riyak 197609  0 Jul 22 21:39 .
drwxr-xr-x 1 riyak 197609  0 Jun 28 16:57 ..
-rw-r--r-- 1 riyak 197609 387 Jan 17 2026 .bash_history
drwxr-xr-x 1 riyak 197609  0 Jul  3 12:36 .cache
drwxr-xr-x 1 riyak 197609  0 Feb 15 17:41 .copilot
-rw-r--r-- 1 riyak 197609 110 Jul 22 21:32 .gitconfig
-rw-r--r-- 1 riyak 197609 20 Jul 22 21:04 .lessht
-rw-r--r-- 1 riyak 197609  5 Apr 14 16:27 .node_repl_history
drwxr-xr-x 1 riyak 197609  0 Jun 17 21:32 .ollama
-rw-r--r-- 1 riyak 197609 176 Jun  2 11:49 .packettracer
-rw-r--r-- 1 riyak 197609  0 Jun  2 11:49 .python_history
```

3. To create a file "welcome.txt" and add context to the file, execute the command

```
C:\Users\riyak>echo "Welcome to the version control" >> welcome.txt
```

4. To verify if the file "welcome.txt" is created, execute

```
-rw-r--r-- 1 riyak 197609 0 Jun 14 2025 helloworld.c
-rw-r--r-- 1 riyak 197609 5308416 Dec 23 2024 ntuser.dat.LOG1
-rw-r--r-- 1 riyak 197609 5480448 Dec 23 2024 ntuser.dat.LOG2
-rw-r--r-- 1 riyak 197609 20 Dec 23 2024 ntuser.ini
-rw-r--r-- 1 riyak 197609 35 Jul 22 21:42 welcome.txt
```

5. To verify the content, execute the command

```
C:\Users\riyak>cat welcome.txt
"Welcome to the version control"
```

6. Check the status by executing

```
C:\Users\riyak\GitDemo>git status
On branch main

No commits yet

nothing to commit (create/copy files and use "git add" to track)
```

7. To make the file to be tracked by Git repository, execute the command

```
$ git add welcome.txt
warning: LF will be replaced by CRLF in welcome.txt.
The file will have its original line endings in your working directory
```

8. To add multi line comments, we are opening the default editor to comment. Execute the command

```
C:\Users\riyak\GitDemo>git commit
```

9. To check if local and "Working Directory" git repository are same, execute git status

```
$ git status
On branch master
nothing to commit, working tree clean
```
